## CONCLUSION

| Tested Sample                            | Standard/Testing Item                                                                                                                                                                                        | Result |
|------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Tested component(s) of submitted samples | U.S. ASTM F963-17 Section 4.3.6.3 & 8.4.1 cleanliness of materials                                                                                                                                           | Pass   |
|                                          | EC type approval protocol No. 2 (European Co-ordination of Notified Bodies NB-TOYS/2021-053 under the Safety of Toys Directive) Microbiological safety of toys containing aqueous media REV 4 (January 2022) | Pass   |

**Microbiological Examination of Nonsterile Products: Microbial Enumeration Tests and Tests for Specified Microorganisms on Group / Composite / of Submitted Samples in Composite (U.S. ASTM F963-17)**

With reference to United States Pharmacopoeia XLIII (2020), Chapter 61 & 62 and ASTM F963-17 section 4.3.6.3.

(1+2+3+4) White shimmer gel. + Pink shimmer gel. + Purple shimmer gel. + Silver color shimmer gel.

| Test Item                                                      | Parameters |        |                                         |
|----------------------------------------------------------------|------------|--------|-----------------------------------------|
|                                                                | Units      | Result | Requirement                             |
| Total Aerobic Microbial Count                                  | CFU per g  | <10#   | -                                       |
| Mould and Yeast Count                                          | CFU per g  | <10#   | -                                       |
| Sum of Total Aerobic Microbial Count and Mould and Yeast Count | CFU per g  | <10#   | Category B: $\leq 1,000$ CFU $\wedge^2$ |
| Coagulase-positive Staphylococcus sp./Staphylococcus aureus    | per g      | Absent | Absent                                  |
| Pseudomonas sp. / Pseudomonas aeruginosa                       | per g      | Absent | Absent                                  |
| Salmonella sp                                                  | per 10g    | Absent | Absent                                  |
| Escherichia coli                                               | per g      | Absent | Absent                                  |
| Bile-Tolerant Gram-Negative Bacteria                           | per g      | Absent | Absent                                  |
| Clostridia sp.                                                 | per g      | Absent | Absent                                  |
| Candida albicans                                               | per g      | Absent | Absent                                  |

**Remark :**

CFU = Colony Forming Unit

# = No colony was detected at the one-tenth dilution of the sample

$\wedge^2$  = Acceptable limit is  $\leq 5,000$  CFU

The Requirement for Sum of Total Aerobic Microbial Count and Mould and Yeast Count is with reference to ASTM-F 963-17 Section 8.4.1 Cleanliness of Material for Category B products.

Category A: Infant products and face paints or cosmetic that have high likelihood of being used on area of the eye.

Category B: Other products (liquids, pastes, putties, gels, powders), cosmetic & toiletries products.

Category C: Avian feather products

Sample received condition: Sample in closed plastic bottle.

**Microbiological examination of non-sterile products : Microbial Enumeration Tests and tests for specified microorganisms on group / composite / of submitted samples in composite**

With reference to British Pharmacopoeia (2020), Appendix XVI B2 & B1 and European Pharmacopoeia 10.0 Edition, Chapter 2.6.12 & 2.6.13.

(1+2+3+4) White shimmer gel. + Pink shimmer gel. + Purple shimmer gel. + Silver color shimmer gel.

| Test Item                                                                         | Parameters |        |                   |
|-----------------------------------------------------------------------------------|------------|--------|-------------------|
|                                                                                   | UNITS_CFU  | Result | Requirement       |
| Total Aerobic Microbial Count                                                     | CFU per g  | <10#   | <=1,000 CFU       |
| Mould and Yeast Count                                                             | CFU per g  | <10#   | <=100 CFU         |
| Bile-Tolerant Gram-Negative Bacteria / Bile-salts Tolerant Gram-Negative Bacteria | per g      | Absent | Absent (<=100CFU) |
| Escherichia coli                                                                  | per g      | Absent | Absent            |
| Salmonella sp                                                                     | per 10g    | Absent | Absent            |
| Pseudomonas aeruginosa                                                            | per g      | Absent | Absent            |
| Staphylococcus aureus                                                             | per g      | Absent | Absent            |
| Candida albicans                                                                  | per g      | Absent | Absent            |

Remark :

# = No colony was detected at the one-tenth dilution of the sample

CFU = Colony Forming Unit

<= = Less than or equal to

The limit is with reference to EC type approval protocol No. 2 (European Co-ordination of Notified Bodies NB-TOYS/2021-053 under the Safety of Toys Directive) Microbiological safety of toys containing aqueous media REV 4 (January 2022).

Sample received condition: sample in closed plastic bottle.

#### COMPONENT LIST

| No. | Test Component Description(s) |
|-----|-------------------------------|
| (1) | White shimmer gel.            |
| (2) | Pink shimmer gel.             |
| (3) | Purple shimmer gel.           |
| (4) | Silver color shimmer gel.     |

End of Report

The statements of conformity reported have considered the decision rule agreed, namely that Intertek have taken account of measurement uncertainty as calculated by Intertek, and applied according to ILAC-G8/09:2019 (Non-binary acceptance based on guard band  $w = U$ ) except designation from the customer, regulation or test specification. This decision rule only applies to the numeric test results.

The sample(s) and sample information hereto are provided by the client who shall be solely responsible for the authenticity and integrity thereof. The results shown in this report relate only to the sample(s) received and tested. It is not intended to be a recommendation for any particular course of action. Intertek does not accept a duty of care or any other responsibility to any person other than the Client in respect of this report and only accepts liability to the Client insofar as is expressly contained in the terms and conditions governing Intertek's provision of services to you. Intertek makes no warranties or representations either express or implied with respect to this report save as provided for in those terms and conditions. We have aimed to conduct the review on a diligent and careful basis and we do not accept any liability to you for any loss arising out of or in connection with this report, in contract, tort, by statute or otherwise, except in the event of our gross negligence or wilful misconduct. This report shall not be reproduced unless with prior written approval from Intertek.
